## Education

Mukesh Patel School of Technology Management & Engineering (NMIMS)

2025 – 2029

B.Tech in Artificial Intelligence

CGPA: 9.47

## Skills

**Languages:** Python, Java, SQL, JavaScript

**Backend:** FastAPI, Node.js, REST APIs, JWT, WebSockets

**Databases & Cloud:** PostgreSQL, MySQL, Neon, Supabase, Google Cloud SQL, Databricks, Google Cloud Platform

**DevOps & Tools:** Docker, Git, GitHub, Power BI, Vercel, Render, Jira

## Experience

**MPSTME ACM**

Jul. 2025 – Present

Technical Lead

Mumbai, India

- Led the design, development, deployment, and maintenance of production-grade web platforms supporting MPSTME ACM operations and flagship events, serving **500+ students** and **50+ committee members**.
- MerchID:** Built a QR-powered digital identity platform using **Next.js, FastAPI, and PostgreSQL**, enabling 50+ committee members to personalize official merchandise with Linktree-style profiles, analytics, secure onboarding, and administrator-controlled management.
- Designed secure backend services with optimized PostgreSQL schema, authentication, analytics, and batch QR generation, achieving **<50 ms query latency**, supporting **100+ concurrent users**, and maintaining **99.95% uptime**.
- ReCode:** Led frontend development of the official platform for ACM's flagship event **Convergence**, enabling participants to explore events, register, access problem statements, and receive live event updates across **6+ event pages**.
- Improved platform performance through lazy loading, image optimization, and SEO, reducing load time by **40%** while achieving Lighthouse scores of **92+ (Desktop)** and **85+ (Mobile)**.

**Freelance Software Engineer**

Jan. 2026 – Present

Full-Stack & 3D Web Developer

- Developed a high-performance **WebGL 3D browser application** using **Three.js**, featuring custom rendering, animations, collision detection, and optimized asset loading for consistent **60 FPS** gameplay.
- Implemented hybrid keyboard, mouse, and native **PS5 DualSense** controller support using the HTML5 Gamepad API, alongside **6 interactive puzzle systems** and dynamic UI overlays.

## Projects

**CareerOrbit | AI-Powered Placement Intelligence Platform**

React.js Node.js Express.js PostgreSQL Google Cloud SQL Gemini API Three.js Docker

- Developed an AI-powered career development platform enabling students to assess placement readiness through AI resume analysis, mock interviews, skill-gap analysis, and personalized job recommendations.
- Designed a scalable full-stack architecture exposing **10+ REST APIs** for authentication, AI interview workflows, AI career coaching, and interview feedback, and job recommendations using PostgreSQL and Google Cloud SQL.

**Data Analytics Portfolio**

Python Pandas NumPy Matplotlib Jupyter Notebook

- Developed a portfolio of end-to-end data analytics projects demonstrating exploratory data analysis (EDA), business intelligence, statistical modeling, and data visualization using real-world datasets.
- Analyzed a **16+ MB** retail sales dataset to identify monthly business trends while performing exploratory analysis on roller coaster datasets to uncover operational insights through statistical visualization.
- Built automated data-cleaning pipelines and animated time-series visualizations to demonstrate preprocessing, feature engineering, and insight generation using Python.
